PROJECTS

Trimrr-URL Shortener

- Engineered a **real-world URL Shortener web app**, enabling users to create, manage, and share concise links—ideal for platforms with character limits, analytics, or branding needs.
- Built a responsive single-page application using React.js, Tailwind CSS, and Shadcn UI, ensuring fast performance and a seamless, modern UX across devices.
- Integrated **Supabase** for end-to-end functionality—**authentication**, **real-time database**, and **serverless hosting**—delivering a secure, scalable solution tailored for real user needs.

HEALTH ASSISTANCE WITH MACHINE LEARNING

- *Developed a real-world **Personalized Diet Recommendation System** using **Python**, enabling users to get dynamic diet plans based on **BMI, BMR , food preferences, and activity levels**.*
- *Engineered robust ML pipelines using **scikit-learn** for **clustering and classification** models that analyze lifestyle data and return **custom diet charts** tailored for health improvement.*
- *Built a responsive and user-friendly interface with **Streamlit** for visualization and used **FastAPI** to build scalable, production-ready APIs for backend integration and deployment.*
